Specification

1. The abstract of the disclosure is objected to because it is not provided on a separate page.

Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claim 7 is objected to because of the following informalities: The limitation "Computer program product---in claim 1" at the end of claim 7 appears to belong to another claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 recites the limitation "computer program product" in line 1. There is insufficient antecedent basis for this limitation in the specification. The same remark applies to claim 7.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 7-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claim 8, the claimed subject matter "Computer program product" is directed toward a software program per se. Since a computer program is merely a set of instructions capable of being executed by a computer, the computer program itself is not a process. In contest, a claimed computer-readable medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory. The same remark applies to claim 7.

Allowable subject matter

7. Claims 1-6, and 9 are allowed.
8. Claim 7 would be allowable if rewritten to overcome the objection as set forth above.
9. Claim 8 would be allowable if rewritten to overcome the 35 U.S.C. 101 rejection as set forth above.
